

Interactive Slice Tool

Activate the smart interactive tool to easily lock onto planes and create Shadow Slices with a single click.

Shadow Slices Manager

Seamlessly toggle visibility between multiple slices with zero lag. Personalize individual section cut colors and manage all active slices from a centralized list.

Shadow-Preserving Cutaway

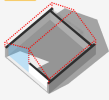

The sliced geometry becomes perfectly transparent while retaining 100% accurate architectural shadows, revealing stunning interiors instantly.

Global Section Styles

Quickly adjust global presentation settings including section plane visibility, global line thickness, and section fill colors to refine your architectural drawings.
